DETAILED ACTION

Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claim 20 is rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 17 of prior U.S. Patent No. 6,804,961. This is a double patenting rejection.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 19 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 16 of U.S. Patent No. 6,804,961. Although the

Art Unit: 3745

conflicting claims are not identical, they are not patentably distinct from each other because claim 16 of the patent "anticipates" application claim 19. Accordingly, application claim 19 is not patentably distinct from patent claim 19. Here, patent claim 16 requires a housing, a hydraulic fluid reservoir, a port, a piston, a seal, a one-piece lever, a reach adjustment, and means for preventing movement of the leading seal edge, while application claim 19 only requires a housing, a hydraulic fluid reservoir, a port, a piston, a seal, a one-piece lever, a reach adjustment independent of movement of the leading seal edge. Thus it is apparent that the more specific patent claim 16 encompasses application claim 19. Following the rationale in *In re Goodman* cited in the preceding paragraph, where applicant has once been granted a patent containing a claim for the specific or narrower invention, applicant may not then obtain a second patent with a claim for the generic or broader invention without first submitting an appropriate terminal disclaimer. Note that since application claim 19 is anticipated by patent claim 16 and since anticipation is the epitome of obviousness, then application claim 19 is obvious over patent claim 16.

Claim 21 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,804,961. Although the conflicting claims are not identical, they are not patentably distinct from each other because claim 1 of the patent "anticipates" application claim 21. Accordingly, application claim 21 is not patentably distinct from patent claim 21. Here, patent claim 1 requires a housing, a hydraulic fluid reservoir, a port, a piston, dead band adjustment means, a one-piece lever, and compensating means while application claim 21 only requires a housing, a hydraulic fluid

Art Unit: 3745

reservoir, a port, a piston, and a one-piece lever. Thus it is apparent that the more specific patent claim 1 encompasses application claim 21. Following the rationale in *In re Goodman* cited in the preceding paragraph, where applicant has once been granted a patent containing a claim for the specific or narrower invention, applicant may not then obtain a second patent with a claim for the generic or broader invention without first submitting an appropriate terminal disclaimer. Note that since application claim 21 is anticipated by patent claim 1 and since anticipation is the epitome of obviousness, then application claim 21 is obvious over patent claim 1.

Allowable Subject Matter
